Welcome to the Lifelong family

Dear Customer,

Congratulations on purchasing Lifelong Aspire Pro Wet and Dry Vacuum Cleaner and a warm welcome to the Lifelong family. At Lifelong, we take pride in developing quality products for your home, health and happiness. Through constant innovation in our products, we have been able to develop a wide spectrum of products across Home, Kitchen, Grooming and Wellness categories. We strive to enrich the lives of the modern consumer every day. Keeping that in mind, we have offered all our products at a fair and honest price.

We hope that the Wet and Dry Vacuum Cleaner serves you and your family's needs without any hassles.

Thanks again for becoming a part of the Lifelong family. Enjoy using the product!

Warm Regards,
Team Lifelong

KNOW YOUR PRODUCT

THE DESCRIPTION AND INTRODUCTION

Usage of the handle:

Pull out the plastic clips and then naturally bend the fingers holding the hand to lift up the machine head.

Usage of the Switch:

Turn off the machine by pressing button "O" for power off. Press "—" for turning on the power.

Usage of the clips:

Follow the picture, pull out the clips to open and remove the machine head

The connection method for hose:

Insert the hose connector.
Insert the pipe into the suction mouth, and then rotate about 90° to make sure it is tightly locked.

Blowing function:

Connect the hose connector with the blowing mouth and tighten, when it starts to work, put the suction nozzle toward the object. Remember to check the hose to make sure the hose wall is clean.

Hanging wire function:

After using, hang the wire here for storage and fix the power cord to the left slot.

Tube assembly storage function:

Hang the tube assembly here for next use.

PARTS IDENTIFICATION

Part No.

Part Name

1. Carry handle
2. Motor unit
3. Blowing port
4. Power cord
5. Steel bucket
6. 360° rotation wheel
7. Side locks
8. Flexible hose pipe
9. Hose handle
10. Suction port
11. ON/OFF switch (O-OFF, "-ON")
12. Floor cum carpet brush
13. Integrated nozzle
14. Extension tubes (2 piece)
15. Cloth filter (Dry use)
16. Sponge filter (Wet use)
17. Sofa Brush

HOSE PIPE AND THE VACUUM CLEANER LINKING

1. Insert: Insert the tube connector into the cleaner, and then rotate it clockwise until it is locked.
2. Exsert: Hand the tube connector, rotate it counter-clockwise until exsert the tube.
3. When using the blowing function, insert the main suction pipe into the blowing port, then rotate it clockwise until it is locked. When exserting it, rotate counter-clockwise, exsert the main suction pipe.

HOSE PIPE CONNECTS WITH OTHER ATTACHMENTS

1. Contact joint: insert one end of the tube into the brush, then rotate it clockwise until it's very tight.
2. Exsert: Hand both ends of the brush, rotate it counter-clockwise until it's out.

HOW TO USE

For Dry Vacuum Cleaning

- Use the dust bag when used for dry only, easy to clean.
- Open the clip, take out the machine head, then cover the dust bag on the bottom basket
- After the machine head is put into the plastic bucket, the machine can start to work after locked two sides of the locks.
- When finish the cleaning or too much garbage is sucked into the bucket, the suction force drops obviously. Please cut off the power and clean up the garbage in the barrel timely.

- I. Open the clip, take out the machine head.

II. Clean up the garbage in the barrel, then put back the machine head and lock it.

For Wet Vacuum Cleaning

- Use the sponge filter when used for vacuum water.
- Open the clip, take out the machine head, take off the dust bag and put sponge filter on the motor head as shown in the diagram.
- When finish the cleaning or the tank is full of water (that time safety valve works) please power off and pull out the water in the bucket.

I. Open the clip, take out the machine head.

II. Pull out water, then put machine head back and lock it.

III. Please dry the sponge filter before reusing the same

NOTE: Never use wet or damp cloth filter for dry vacuum process. In that case always dries the cloth filter in sun light and use it in accordance.

INSTRUCTION AFTER USE

1. Turn off the machine by pressing "o" for turning it off.

2. Pull out the plug and put the wire in the socket.

3. Take off the hose and floor brush, to clean the rest of the dust.

6. Take off the filter, wash and dry it for next use.

5. Clean the tank and dry it with a soft cloth.

4. Take off the head as shown in the picture.

PROTECTIVE DEVICE

Special instruction of the protective device

- When tank is full of water, the device will raise up, suction power will stop and abnormal noise indicates that the motor is running at a high speed. If this happens, you should cut off the power, and pour away the water. Turn on the power once dry, and it will begin to work normally again.
- When vacuum cleaner overturns or shakes, you should cut off the power and make it upright, then turn on the machine again.
- When tank is full of water, the device will rise up, suction power will cut off, please stop the machine immediately.

CLEANING & MAINTENANCE

Before cleaning , please turn off the power and pull off the plug.

Methods of cleaning:

- Use brush to clean the dust on the filter
- Use tap or shower wash the filter from inside to outside for better clean.
- Put the filter in a well-ventilated place to air-dry it.
- Store it properly for your next use.

Note: After your washing

- Be sure of intensive drying (To avoid bad smell or block)
- Do not use air blower or another kind of hot-blast air drying it (To avoid causing failures due to out of shape).
- Do not use detergent/bleach/thinner/alcohol etc (to avoid causing cracks and fading color).

ATTENTION TO AVOID FIRE

- Do not move it when the clips are unlocked. (To avoid damages when moving it).
- Use wire and plug in a correct way. Please pull out the plug when not in use. (To avoid bad insulation causing electric shock/the leakage of electricity or fires).

Avoid incorrect operation

- Do not put metal into the connector of this machine (To avoid electric shock).
- Do not pull the plug by the wire.
- Do not pull or move the machine by pulling the hose.
- Please use the handle to move or pull it (To avoid damages caused by falling) .

OPERATION REQUIREMENTS

- Please do not collect the following things in case of breakdown or bad smell:

Dehumidizer.

Massive powder(construction waste/powder of fire extinguisher).

Pet excreta etc.

Glass/tins/needles/toothpicks.

Something easy to block the Hose (ropes/stockings).

- Please use the hose carefully (to avoid damage).

-To avoid the motor overheating Please do not use it continuously for more than half an hour, otherwise this may reduce its working life time.

When the tank is full of dust.

When the suction mouth is blocked.

When the hose, tube, nozzle is blocked.

- Please do not use the hose or the tube to collect dust directly to avoid wear.

- Please use the floor brush or crevice nozzle etc.

- Please do not block the air-outlet (To avoid making it going out of shape caused by overheating)

- Please do not continuously use it, when the suction mouth is blocked.

- Please check whether the cloth or HEPA filter was installed before using (To avoid waste getting into the motor directly, causing the burning smell).

TROUBLESHOOTING

Problem	Analysis reasons	Solutions
Not working	1. Check whether the plug has been inserted tightly 2. Check the socket is power on or off	1. Re-insert the plug into the socket tightly 2. Ensure the socket is power on
Suction reducing	1, Check whether the hose, tube was blocked 2, Check whether the filter was blocked 3, Check whether the machine was fastened tightly 4, Check whether the air-out filter was blocked 5, Check whether the adjust window in the adjust handle(hose) is closed	1. Clean up the obstructions in time 2. Clean up or replace the filter
Big noise or unnormal noise	1, Check whether the filters were blocked 2, Check whether the hose, tube or accessories were blocked	1, Clean & maintain the filter 2, Clean up the obstructions
