DESCRIPTION OF PARTS:

USING AND STORING:

Caution hot surfaces: This appliance generates heat and surface can develop high temperature. Only touch the appliance at the intended handles and gripping surfaces. Do not touch the exteriors of the appliance when in use as the metal surface will be very hot during the operation or immediately after use. The appliance must be given time to cool down after use

- Keep this instruction manual in a safe place for future reference.
- Users must read and understand the instructions provided in this booklet before operating or cleaning the appliance. Before plugging in, ensure that the voltage specified on the rating label of the appliance corresponds with the electricity voltage of the power source.
- This appliance is for household use only.
- Persons with reduced physical, sensory or mental capabilities should be properly instructed before being allowed to operate the appliance and should be supervised while they operate the appliance.
- Keep the appliance out of reach from children at all times. Close supervision is necessary when used near children.
- Do not let the power cord hang over the edge of the table/counter or touch any hot surface. If the plug cord is damaged, do not use the appliance.

In case of any repairs, replacement of cord or plug, or adjustments, please consult a technician.

Disconnect the plug from the power source before cleaning, while emptying and when not in use.

If the appliance falls or accidentally becomes immersed in water, disconnect the powersupply and unplug it from the wall outlet immediately. Do not try to reach out ortouch the appliance before disconnecting the power supply and removing the plug from the power source.

When using the appliance, ensure that there is adequate air space above and on all sides for air circulation. Keep the appliance at least 6" (15 cm) away from the wall. Place the appliance on a flat surface while operating. Never leave the appliance unattended.

USING THE APPLIANCE:

NOTE: For the first usage, let the appliance heat without putting any foodstuff on the heating plate for about ten minutes. The appliance may emit smoke or smell, this is harmless and normal for first time usage.

For each use:

- Uncoil the cable completely.
- Check if the heating plates are clean and dust-free. If necessary, wipe them with a damp cloth.
- For the first usage, let the appliance heat without any food for about ten minutes. There may be slight smoke or smell. This is normal and harmless.
- After connecting the plug into the rated voltage, the heating plate begins pre-heating and both the red and green lights will be illuminated at the same time.

After the heating plate has reached the pre-set temperature (usually it will take about 2-4 minutes), the green light will go off and the appliance will be ready for cooking.

- During the operating process, the red light will be on as long as the power supply is connected.

- Lift the upper lid of the appliance and place the food on the lower heating plate. Close the appliance and the green light will go on. (During the grilling process the indicator light may go on and off due to automatic temperature control).

- Frozen food should be completely defrosted prior to grilling.

- If too much food is loaded onto the heating plate, the appliance will not close, you can slide the upper tray to try to close it but never use undue force as this could damage the appliance.

- Set the selector knob as per your required heating range (Min to Max).

- During grilling, excess fat may flow through the drain holes into the drip tray.

- After the green light goes off again, the food should be grilled till it is cooked to your satisfaction.

- Once you have finished cooking, open the lid and take out the food with a wooden spatula.

- Never use a sharp fork or knife to remove the food as this would damage the non-stick coating of cooking surface. Use heat-resistant wood spatula only.

- Pull out the plug and leave the upper lid open so that the appliance can cool down.

- Based on the food type and thickness, the cooking average time can be about 5-8 minutes.

CARE AND CLEANING:

Before cleaning the appliance, unplug the cord from the outlet.

Do not put the appliance, cord or plug in water.

Wipe the body with a damp cloth. Never use metal polish.

Wipe the heating plates with a soft damp cloth every time after use. If it is difficult to remove residues, put a little oil and wipe.

Take the drip tray out and clean separately. Make sure it is dry before re-attaching to the appliance.

Do not use any cleaning spray on metal objects as it could damage the non-stick coating.

Be sure to dry all parts thoroughly before you use the appliance again. Do not use sharp objects to clean the appliance as it would damage the non-stick coating.
