LLAC918

PRODUCT SPECIFICATIONS:

SKU ID	LLAC918
Tank Capacity (Ltr)	18
Power Supply	220-240 V, 50 Hz
Power Consumption (W)	80
Air Delivery	1416 m ³ /hr
RPM	2000
Speed	3
Cooling Media	Honey Comb
Product Dimensions(mm)	275 mm X 300 mm X 590 mm
NW (kg)	5.6 kg
GW (kg)	6.7 kg

QUICK START GUIDE:

Read all instructions carefully before setting up and operating the unit, and please keep this instruction manual for future reference. This manual is designed to provide you with important information needed to setup, operate, maintain, and troubleshoot your cooler. Failure to follow these instructions may damage and/or impair its operation and void the warranty.

1. Fill with water and plug into standard power outlet.

Note: Please make sure that the power outlet is set to correct settings as per product specifications.

2. Place near open door or window.

Note: Evaporative Air Coolers work on evaporative cooling mechanism which requires cross ventilation.

3. Keep a minimum distance of 0.5M from the wall.

4. Turn ON and enjoy the cooling breeze.

Note: Start with LOW speed and gradually increase to higher speed for optimum cooling performance.

5. Keep the room ventilated for maximum efficiency.

OPERATING INSTRUCTIONS:

- Choose a suitable location for your cooler.
- The cooler can be operated manually by the control panel located in the front of the cooler.

FOR ROOM COOLING:

- Connect to the power supply and turn the speed knob. The fan will start.
- Turn the speed knob to change the speed from Low to Medium to High.
- To ON turn the cool knob to start cooling. It will take a few minutes to obtain cooling effect.
- When the water in the tank is low turn the cooler OFF and add more water.
- To switch OFF the cooler turn the speed knob to Off position. - Empty the water tank if the cooler is not being used for some time.

Note: Evaporative air coolers are built to maximize energy efficiency and keep costs low. This no-compressor system cools naturally, efficiently and inexpensively. The recommended relative humidity is 60% or less which allow noticeable temperature to decrease in the air.

TO FILL THE WATER:

Pour water in the manual water inlet located at the back of the cooler.

OPERATION OF LOUVRES:

Turn the SWING knob to ON for oscillating the louvre from one side to another. To stop the louvers, turn the SWING knob to OFF. - You can change the air direction (up or down) by manually adjusting the horizontal louver.

Note: This evaporative air cooler is not an air conditioner, as it does not use a compressor or a refrigerant gas. It should not be expected to cool as efficiently as a refrigerated air conditioner.

DEVICE CLEANING AND MAINTENANCE:

- Before you clean the cooler, switch the cooler off, remove the plug from the power socket. Use a damp cloth to clean the cooler.
- DO NOT use water, detergents, petrol, spirits to clean the cooler.
- When not in use for a long time store the cooler in a dry, dust free area even during off season.

DOS & DON'TS:

- To avoid electric shock, fire or injury, please read the user manual carefully before using the appliance and keep it for future reference.
- This appliance is for household use only. Please use suitable power source (Please refer to SPECIFICATION).
- Never immerse the appliance in water or other liquids.
- Do not use the appliance under direct sunshine.
- Please turn off the appliance when not in use otherwise it may result in danger. Please turn off the appliance and unplug the socket when unattended otherwise it may result in danger.
- Keep the appliance away from children.
- The appliance is not intended to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

- With any indication of malfunction, please stop using the appliance immediately to avoid hazards. call the authorized customer care number for repair. Do not attempt to repair or change any parts by yourself.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid hazard.
- Please turn off and unplug the appliance before water filling, cleaning or maintenance.
- Clean the surface of the appliance with dry cloth. Do not use corrosive detergent or solvent to clean. Do not swash the appliance with water.
- Please turn off and unplug the appliance when not in use. Make sure the power is off before pulling out the plug and do not pull the cord.

TROUBLESHOOT CHART:
