About The Product:

The Vibez smartwatch comes with a display, and a dial that supports a captivating design and a responsive touch interface for effortless control. The health monitoring features in the watch help you keep a track of heart rate and are great to keep a track of your blood oxygen levels as well.

App Installation:

You can use the “scan” function in the browser to scan the “QR code” of the watch and download and install “Vibez Active.” You can also download and install “Vibez Active” by searching for “Vibez Active” in the App Store, Google Play Store, etc.

Smart Watch Operations:

QR Code Connection

After you open the app, if the dialog box for obtaining permission pops up on the mobile phone, Please click Allow to obtain. In the “Device” interface of the APP click “Add Peripheral now” and select the “Scan” function in the upper right corner of the “Binding Device” interface. The mobile phone can scan the QR code in the “Settings” of the watch. During the pairing process, the connection confirmation button will pop up on the watch and mobile phone. Please click “Allow pairing” to complete the pairing.

Manual connection

After opening the mobile phone bluetooth, open Vibez Active and click on the "Device" interface and click on the "Add Peripheral now" and search the nearby Bluetooth in the binding device interface, you just need to find the name of the watch (models), click to enter matching, during the matching process, watch and the mobile phone and connection confirmation button will pop up on the watch and mobile phone. Please click "Allow pairing" to complete the pairing.

When you finish the above operations, slide down on the watch face, you will see the colour change of the "Bluetooth" icon and confirm the Bluetooth status through different icons.

BT Disconnection

In Vibez Active, click "Unbind" on the "Device" interface of the App to unbind the watch. After the APP is unbound, manually enter the Bluetooth connection interface of the mobile phone again, find the name of the paired watch and click "Unpair" (click "Ignore Device" in IOS) to finish the complete unbind.

Function key:

- Long press the button for 4 seconds to power on or power off.
- Press one time to enter the main menu on watch face.
- Quickly press two times to switch the main menu to assorted styles on main menu.
- Short press to return the watch face.

Do's and Don'ts:

- Please do not expose the main unit to any chemicals.
- Please do not place the main unit close to strong magnetic fields or electric fields.
- Please do not put the unit under water or near elevated temperatures.
- Please do not disassemble or try to repair the product yourself.

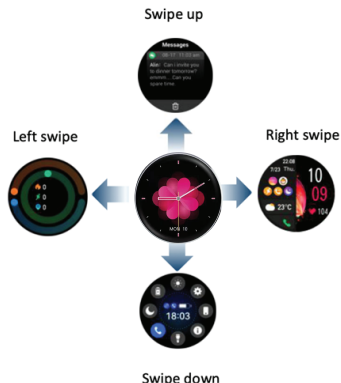

Swipe Manual:

▼ Swipe down: Enter the control centre to view Bluetooth status, battery power and some common functions.

▲ Swipe up: Enter the message notification interfaces, swipe up or down to view each message, swipe left to delete a message.

◀ Left swipe: Enter the function interface, including sports data, heart rate, sleep, weather, and other interfaces.

▶ Right Swipe: enter split screen interface.

Charging Manual:

1. The battery icon of the watch will become red when the battery capacity is less than 20% the Operating System will automatically turn off the motor vibration function. If the power saving mode is enabled, the watch will turn off the Bluetooth, reduce the brightness to the lowest, turn off the raise to wake, turn off the automatic detection of heart rate, vibration motor and other functions.

2. The watch charging need to use 5V power adapter and it is required to be 5V 500mA or 5V 1A. When the magnetic charging base is aligned with the charging part of the watch, the watch will automatically attract the charging base. When charging, the watch will be prompted by the charging interface, and the charging icon will be stationary after being fully charged.

3. Because the charging base is magnetic, it is easy to absorb other conductive metal objects, please timely close the power adapter after the completion of charging, pay attention to the magnetic base and do not touch other metal objects or be adsorbed on the metal objects, to avoid short circuit.

Know Your Device

1. Using in Wet Conditions

Your device is water-resistant, which means it is rain-proof and splash-proof and can stand through the sweatiest workouts.

NOTE: Do not swim with your Smart Bracelet. We also do not recommend showering with your smartwatch.

Though the water will not affect the device, wearing it 24/7 does not give your skin a chance to breathe. Whenever your smartwatch gets wet, dry it thoroughly before putting it back on.

2. Using Quick View

With Quick View you can check the time or the messages from your phone on your Smart Bracelet without taping. Just turn your wrist towards you and the time screen will appear for a few seconds.

3. Environmental Conditions

Operating temperature: 14°F to 122°F (-10°C to 50°C) Non-operating temperature: -4°F to 140°F (-20°C to 60°C)

4. Size: Fits a wrist between 5.5 and 7.7 inches in circumference.

5. Disposal and Recycling

Please kindly be aware that it is the consumer's responsibility to properly dispose of and recycle Smartwatch and accompanying

components. Do not dispose of Smart Bracelet with common household waste, the Smart Bracelet unit is considered electronic waste and should be disposed of at your local electronic equipment collection facility.

For more information, please contact your local electronic equipment waste management authority or the retailer where you bought the product.

Q&A:

1. Sleep data is not accurate enough

Sleep monitoring simulates people's natural sleep and wake up time, so it needs to be worn normally.

If you wear it too late or when you fall asleep, errors may occur. sleep data is not monitored during the daytime, the default sleep monitoring period is 9:30 p.m. to 12:00 a.m. the next day.

2. BT is not connected or cannot be connected

Restart the watch and reconnect.

Please try to restart the mobile phone BT and connect again.

Do not connect the mobile phone to other BT devices at the same time.

Try to connect the mobile phone again after untying other devices.

3. Inaccurate measurement of heart rate/blood oxygen

When measuring, it is caused by poor contact between watch sensor and wrist. Please pay attention to the full contact between the sensor and the wrist during measurement. For people with darker skin and hairy arms, please go to the App to open [Devices-Enhanced measurement].

The heart rate monitoring and blood oxygen (SPO2) features of this watch are not medical devices and are not intended for medical use, including self-diagnosis or consultation with a doctor, or for medical diagnosis, treatment, curing, monitoring or any other medical purpose. They are only designed for general awareness purposes.
